

## BEST PRACTICE-I: PROMOTING SKILL DEVELOPMENT ACTIVITIES

### INTRODUCTION

In the present era of emulous and competitive trend working with ambiguity and innovative move is crucial to success where skill development is no longer considered as a matter of choice but an imperative for survival. Adapting skills and attitude parallel to maintaining academic excellence is inevitable in pursuing a career.

### OBJECTIVE

Making use of the opportunity and flexibility provided in the curriculum the Department promotes skill development among the students with a view to encourage them towards self - employment or choosing a career in the different applied fields through the following activities.

### AQUARIUM MAKING

Learning the skill of aquarium making is profitable both as a hobby and as an income generating business.

## AQUARIUM FISH KEEPING & BREEDING

Aquarium fish keeping is a popular hobby practiced by aquarists across the world. Aquarium fish (ornamental fish) breeding is a lucrative and profitable small scale business.

## MAINTAINING MULBERRY GARDEN

Mulberry foliage is the only food for silkworm (*Bombyx mori*) and is a major economic component in sericulture. The quality and quantity of leaf produced have a direct impact on cocoon harvest.

## SILK WORM REARING

Sericulture forms an important agro- industry in many states of India with excellent economic benefits. Developing skill in silk worm rearing is profitable in procuring a job in the industry or start a career under self-employment.
