

INNOVATIVE ACTIVITY – I

CONSTRUCTION OF SIT OUTS USING DISPOSED PLASTIC WATER BOTTLES

The Department launched a pilot project “construction of sit outs using disposed plastic water bottles” on the campus in 2016, promoting the concept of reuse of plastic waste. Disposed plastic water bottles were collected, filled with sand and used in place of bricks. It has the dual benefit of reducing the non-biodegradable plastic waste from the environment and minimizing the cost of construction.

The Department plans to take the project for further constructions in future.

REUSE OF DISPOSED PLASTIC WATER BOTTLES

RECEIVED APPRECIATION BY THE HON'BLE CHIEF MINISTER SRI.N.CHANDRA BABU NAIDU
