### Topic: GLOBALWARMING

DATE: 23-1-2020

Global Warming is a term almost everyone is familiar with. But, its meaning is still not clear to most of us. So, Global warming refers to the gradual rise in the overall temperature of the atmosphere of the Earth. There are various activities taking place which have been increasing the temperature gradually. Global warming is melting ice glaciers rapidly. This is extremely harmful to the earth as well as humans. It is quite challenging to control global warming; however, it is not unmanageable. The first step in solving any problem is identifying the cause of the problem. Therefore, there is need to first understand the causes of global warming that will help to proceed further in solving it. In these competitions students have drawn and explained causes and solutions of Global Warming.

They also won I,II,III prizes.
