

FIELD TRIP TO Central Institute of Plastic & Engineering Technology (CIPET)

III BSC chemistry cluster students visited CIPET, Enikepadu, Vijayawada on 19-11-2018.

Participants:

A total number of 37 cluster students and faculty.

Description of the programme:

Central Institute of Plastic & Engineering Technology with a state of the art infrastructural facilities in the field of plastics is at Enikepadu. The centre offers skill development training programmes in plastic processing/injection/moulding/extraction sponsored by various central and government agencies. The lab has facilities for testing of plastic products, PVC pipes, hand operating injection moulding machines, hot plate welding equipment, hydraulic cut sections, microprocessor controlled machine, colour blended machinery etc. It provides excellent job opportunities for the chemistry students. It offers one year diploma course after the graduation. At this institute students learned about the preparation of mineral water bottles, injection moulds and various plastic materials. Students got thorough knowledge about the chemicals, equipment, polymer materials used in plastic industry. Truly it is a fruitful outing for the students.
