

“Chemical Education in India

“Challenges, Perspectives & Future Opportunities”

Preamble:

On the Occasion of Valedictory function of “Rainbow Week- 2023” arranged a Guest Lecture on **“Chemical Education in India- Challenges, Perspectives & Future Opportunities”** on 24th November 2023.

Participants:

200 Students of Chemistry.

Resource Person:

Dr. Mahesh Kumar Ravva, PDF., Ph.D., Associate Professor, Department of Chemistry, SRM University Amaravati.

Description of the Programme:

On the occasion of Valedictory Function of Rainbow Week-2023 celebrations the Department Organised a Guest Lecture on **“Chemical Education in India- Challenges, Perspectives & Future Opportunities”** for all Chemistry students. The resource person clearly explained about the career opportunities in Chemistry. He also explained about the research methodologies in chemistry. The Resource Person discussed about the different types of jobs related to chemical education. He made a comparative study on the Indian research publications versus other countries like China, USA, Japan and Germany etc. Finally he concludes the session with suggestions regarding Chemical Education and future opportunities. After completion of this session he distributed prizes to winners of Rainbow Week-2023.
