

“Changing Environment- Dangers and Solution”

Seminar on Changing Environment- Dangers and Solution on 3rd July 2018.

Participants:

A total number of 60 students.

Resource person:

Sri Velaga Srinivas, Convenor, Paryavarana Parirakshana Vedika, Vijayawada.

Description of the programme:

The resource person inspired the students by indicating the reasons for the changing of environment, industrialisation and its consequences. He also motivated the students and gave suggestions to protect the nature. Sri V.Srinivas in his talk expressed that the climate change destabilises the temperature of the earth, leads to global warming due to the increased concentration of greenhouse gases. He discussed about direct consequences of climate changes like raising of maximum and minimum temperatures, shrinking of glaciers etc. He also explained about indirect consequences like Acidification of Ocean, loss of Biodiversity, heat waves and health risks.

“We won’t have a society if we destroy the environment”
