

Seminar on Chromatographic Techniques

Arranged a Seminar on **Chromatographic Techniques** on 02-02-2018.

Participants:

A total number of 60 students and faculty .

Resource person:

Prof. B. Hari Babu, Dept. of Chemistry, Acharya Nagarjuna University, Guntur.

Description of the programme:

Chromatography is one of the most powerful tools in Analytical Chemistry. In his lecture the resource person stressed different Chromatographic Techniques used in the separation, purification, isolation and identification of samples in laboratory and industry. Students understood the use of Chromatography in industrial process to purify chemicals, their application in quality control, forensic testing, blood testing, drugs or poisonous substances in the body etc. He also explained the principles of liquid, gas, thin layer and paper chromatography and their applications in Analytical Chemistry.

“Science is a beautiful gift to humanity; we should not distort it”

– A.P.J.Abdul Kalam
