Nature of Programme : Seminar

Title : Learning & Career Opportunities in Agriculture, Food & Export business

Number of Participants : III FMC Students

Date : 08/03/2023

Total No. of Participants : 41

Brief Report:

On 8th Mar 2023, seminar on "Learning & Career Opportunities in Agriculture, Food & Export business" was organized by the Dept. of Food Science & Technology in collaboration with the Dept. of Commerce. The session was addressed by Prof. D Nabi Rasool, Indian Institute of Plantation Management, AP Center, an autonomous organization of the Ministry of Commerce and Industry, Government of India. He highlighted that there are huge gaps in food production, food manufacturing and food export business. These gaps are due to ups and downs in production and the lack of technical details of how to deal with such discrepancies. He stated that youngsters can learn to use these as career opportunities wherein they can initiate novel ideas to begin start-ups to deliver quality and a variety of food products to the consumers.
