Brief Report :

On the eve of National Cancer Awareness Day the Department of Biochemistry in association with Rotary Club of Amaravati organized a Seminar on Awareness on Cancer. The Resource Person have highlighted the significance of the day which is coinciding with birth anniversary of the Nobel prize winner Madame Curie who worked on radioactivity. The Resource Person also explained the Types of cancers, causes, symptoms, tests used for early detection of cancer, treatment and foods to be taken to avoid cancer. She also focussed on the importance of Mammogram test in women.
