

VISIT TO AGRICULTURAL CROPS

The Department arranged a field visit to III BA students to Agricultural Fields at Poranki near Vijayawada on 21-01-2018.

Students gained knowledge about the farming of various crops like Cauliflower, Sugar Cane, Turmeric etc., and about how and when to plant the crop. They learnt about the importance of these crops in the growth of state economy. This gave them practical knowledge about the problems faced by the farmers in terms of productivity, storage facilities and marketing of the yield.
