About the College:

With the belief that "There is no greater pillar of stability than a strong, free and educated woman", The Siddhartha Academy of General and Technical Education forayed into education of women by launching Sri Durga Malleswara Siddhartha Mahila Kalasala in 1983. Since its inception, the college has been providing quality education to young women training them to become skilful, resourceful, holistic entities and assets to the society. The conferment of A++ grade by the NAAC in 2021, CPE status in 2016, ISO 9001-2015 certification and a clutch of awards such as 79th Rank of NIRF (2017), top ranking by India Today, Education World Rankings, Grand Jury National Ranking have proved that the institution is a force to reckon with. Further accolades such as the "College with Best NSS units", "Best Eco-Friendly Award", "Best Library Award", "Life Saviour Award", have proved the excellence and professional standards being implemented by the dedicated band of faculty and Management.

About the Department:

The Humanities comprising of the departments of Economics, Political Science, History and Languages serve as the stronghold of local, national and global values to empower women and transform them into holistic entities. Motivational talks, need-based seminars, workshops and training programmes provide them the needed impetus to develop skills and talents. Hands-on learning has always been one of the most important learning methodologies ranging from field-trips, community surveys, sensitization programmes projects, Community service projects, and preparing students for competitive exams.

ABOUT THE CONFERENCE :

The Emerging trends in the Humanities are intrinsically related to interdisciplinary features that allow Science and Technology to benefit from the creativity of Arts subjects. The World today is witnessing a rapid growth in areas such as medical humanities and digital humanities that bring together knowledge from areas as diverse as medical and computers to bear upon traditional subjects such as politics, language, economics and history. This emergent trend in hitherto unrelated disciplines has its benefits on humanity as a whole. Embracing digital technologies has helped in exploring ways in which culture, literature, history and art are electronically stored and curated. This will have huge implications for the preservation of the ephemera of our culture for the posterity. Interdisciplinary and new technologies are being embraced by academics in the humanities paving the way for innovative and exciting avenues that help deepen our knowledge in multifaceted approaches to research in all disciplines

THEME:

This International Conference "The Emerging Trends in Digital Humanities" will bring together academicians, scholars and faculty to discuss and debate on a variety of topics related to understanding the interactivity of the humanities and the digital world. The Conference aims at facilitating a platform to discuss ideas and issues that emphasize on digital methods, trends, practices, cyber law, digital arts etc. Through key-note addresses, panel discussions, plenary sessions the Conference will be an inter-active exchange of fruitful deliberations that will transcend disciplinary boundaries.
