Brief Report : Department of Zoology and Aquaculture Technology organised a guest lecture on ‘Smart Aquaculture’. The Resource Person created awareness on the career objectives and scope of Aquaculture in present day. He shared information about the different institutions providing fisheries education and employment in both Central and State Government Institutions. V.Rathna Kumari Founder of MILATRONICS had invented an automatic feeder which reduces the feed waste in aqua farms in this way he explained students how to become a successful entrepreneur. He also explained about the usage of new smart technologies like sensors which reduce the work of aqua farmers. Students actively participated in the Interactive Session and got their doubts clarified.

Resource Person addressing the students

Exchange of MoU between SDMSMK & MILATRONICS
